

Field Data Collection

GET TO MARKET FASTER WITH WEDRIVEU AND AVIS

Delivering large-scale transportation Program Solutions for technology and telecommunications leaders.

Strategy and implementation across North America

- GPS mapping: We collect street-level data and images by operating on-board computers and cameras
- Digital signal testing: We drive engineers in their car while they safely perform signal diagnostics and transmit data

Recruiting, training and management of professional drivers – Employed by WeDriveU (no contractors)

Dedicated account team – Plans routes, schedules and travel

Enterprise-class risk management – Unique approach to managing staffing and fleet risk

Fleet options – Reserve mini-leases from Avis or use your fleet

Robust analytics – Program metrics to optimize your success

Improve efficiency and safety using professional drivers with local knowledge

Expertise and best practices proven over 25+ years

Programs include Bing Streetside and Qualcomm
